

CREATING THE TALENT FOR TODAY AND TOMORROW

**BUILDING THE NEXT GENERATION
OF ENGINEERS WHO BRIDGE
LEGACY SYSTEMS AND
AI-POWERED FUTURES.**

A structured, government backed programme to create skilled AI Legacy Modernisation Engineers who understand your critical legacy systems and use modern technologies to transform, optimise and future-proof your business.

UK GOVERNMENT FUNDING CAN BE APPLIED

In most cases, we secure full government funding for the complete training (estimated c. £18k). We manage the process for you.

THE CHALLENGE

Your legacy systems are critical to the business – but the skills, knowledge and capacity to support and modernise them are at risk.

- ⚠ Key experts are retiring
- ⚠ Tribal knowledge lives in people, not documents
- ⚠ Fewer engineers with legacy system experience
- ⚠ Modernisation and AI projects lack deep system knowledge

THE RISK OF INACTION

- Operational risk
- Knowledge loss
- Project delays
- Rising costs
- System fragility

THE PROGRAMME

NURTURED GROUP OF GROWING TALENT

We build a cohort of motivated individuals ready to grow into skilled AI Legacy Modernisation Engineers.

GOVERNMENT APPROVED & BACKED COURSES

Structured learning pathways leading to recognised qualifications in legacy systems, modern technologies and AI. Fully funded in most cases.

TUTORS & COACHES

Dedicated Tutors and Coaches provide ongoing guidance, support and development throughout the journey.

COMMUNITY & SPECIALIST SUPPORT

Access to our community platform and a network of specialists on hand to solve problems and share expertise.

REAL WORLD IMPACT

Apply learning to real business challenges and modernisation initiatives to deliver value from day one.

HOW IT WORKS

WHY ORGANISATIONS CHOOSE THIS PROGRAMME

- PROTECT WHAT MATTERS**
Preserve critical systems and business knowledge.
- BUILD THE SKILLS YOU NEED**
Create in-house capability for today and tomorrow.
- ACCELERATE MODERNISATION**
AI-enabled engineers who can deliver real change.
- GOVERNMENT FUNDING AVAILABLE**
We secure UK government funding so you can build capability at no cost.
- REDUCE RISK AND COST**
Less reliance on contractors and hard-to-find skills.
- SUSTAINABLE TALENT PIPELINE**
Create a long-term pipeline of skilled legacy and modern technology engineers.

IDEAL FOR ORGANISATIONS USING

- MultiValue / Pick systems
- COBOL platforms
- Revelation / ARev
- AS/400
- ERP systems
- Bespoke legacy applications
- Core operational databases

**BUILDING AI LEGACY MODERNISATION
ENGINEERS FOR TODAY AND TOMORROW.**

Strengthen your business. Empower your people. Shape your future.
